PROJECTS

Professional Portfolio — *Portfolio Page*

A professional portfolio page I created to display my work in code. Here you can find examples of my work and projects and see what I can do with my Skills.

Technologies used:

HTML, CSS, JavaScript, Media Queries, Bootstrap, GitHub, VS Code, Git Bash

<https://github.com/Tiffany7809>

World Travelers Translation App— *Translator Application*

An application that allows users to input text in English and receive a translation in their chosen language. Users can select a word from their input and get a list of definitions and synonyms for that word.

Created with 3 other Developers as a group project working with Git Bash.

Technologies used:

HTML, CSS, JavaScript, Foundation, GitHub, VS Code, Git Bash, Google Translate API, Merriam Webster API, Figma, JQuery

https://levisgaragegroupinc.github.io/translation_app/

Random Password Generator— *Random Password Generator*

An application that accepts user input for length and desired characters to be used in a password that is then randomly generated for the user.

Technologies used:

HTML, CSS, JavaScript, GitHub, VS Code, Git Bash
